WORK EXPERIENCE

- 02/2023 – present
Bengaluru
- Software Engineer Intern, JPMorgan Chase & Co**
- Full stack developer in Notional Pooling System project.
 - Automating UI which for 5000 users having total account worth \$13 billion.
- 08/2022 – 11/2022
Winnipeg, Canada
- Research Intern, University of Manitoba**
- Research in the field of Data visualization and visual analytics.
 - Developing applications for visualizing frequent patterns using Javascript.
- 06/2022 – 07/2022
Bengaluru, India
- Software Engineer Intern, JPMorgan Chase & Co**
- Being a part of the team behind the liquidity transformation.
 - Independently managed and made a standalone application using Spring Boot, Cassandra, and ReactJS.
 - The project has key importance in calculating and posting liquidity data.
 - Impacts directly on the money of corporate company's cash flow.
- 01/2022 – 04/2022
US (Remote)
- Software Engineer Intern, Wolfram Research** 
- I was a part of the distributed systems engineering department
 - Performing daily test triage
 - Adding features to cloud development tools
 - Adding features to test system
 - Used technologies like Wolfram, Java, XML
- 06/2021 – 07/2021
Chennai, India
- Research Intern, Vellore Institute of Technology, Chennai** 
- Collaborated with Université de Pau et des Pays de l'Adour (UPPA University), France team.
 - Analyzed requirements, planned, designed, and developed an application for data acquisition. It is to be used in machine learning. 1000s of users would use the app for research purposes.
 - Sending information to the cloud using RESTful APIs.
- 03/2020 – 07/2020
Bangalore, India
- Software Development Intern, GoYaana** 
- Designed, built minimum viable product applications with interactive user interface (UI) using Android (Java) and Firebase.
 - Integrated Places API, Directions API, SDK for Android, etc. with the app.
 - Tested, debugged, and fixed errors after their development.

EDUCATION

- 07/2019 – 06/2023
Chennai, India
- B.Tech in Computer Science and Engineering, Vellore Institute of Technology, Chennai**
- 9.17 CGPA
 - App developer at Google Developer Student Club
- India
- High School**
92.4%

SKILLS

C++, Python, Java, Javascript (JS), SQL, Data Structures and Algorithms, Software Engineering, REST APIs, Git, Spring boot

ACHIEVEMENTS

Code For Good- JP Morgan Chase & Co. (2021)

Among the top 650 in the country selected in the 24hrs Code for Good Hackathon conducted by JP Morgan Chase & Co.

Developer at OpenCEMS, France

Mobile app developer. Working with chairleader, post-docs, and researchers to contribute to open-source society. Link .

Expedia Career Discovery Program Mentee (2021)

Among the top 100 in the world selected for the mentorship program.

PROJECTS

Parallel Pattern Matching Trie (TriePDC)

- The project is about matching words efficiently among text files, made for the Parallel and Distributed Computing course.
- Multiprocessing is used for indexing the files efficiently.
- Trie data structure is used for getting the required prefix search and match in optimized time.
- **Technologies used:** Python, Multiprocessing, JSON, Object-Oriented Design (OOP)

Terlocker

- Planned, designed, developed, documented, and implement an application that provides an extra layer of security by allowing the user to lock their terminal sessions in Linux.
- **Technologies used:** C++ and Bash, Linux

EAST- Easy And Secure Test

- Planned, designed, and built an online platform (website) for hosting quizzes that serve both faculties and students.
- Both faculty and student can use the website (client server development).
- Faculties could check student performance, set question papers, see the overall performance, etc. and the students would attempt tests and see their progress.
- **Technologies used:** PHP, MySQL, Javascript, HTML, CSS
